

G.Stop 7

Retractable Fall Arrester

The G.Stop 7 fall arrester is manufactured in the UK using precision machined components. The internal components are manufactured using bronze, stainless steel and aluminium. This ensures complete reliability and high performance even in the harshest of environments. Our G.Stop 7 fall arrester is the perfect choice of safety equipment.

The G.Stop 7 fall arrester offers the user full protection from falling whilst allowing complete mobility when working at height. If a fall was to occur, the steel cable is extracted from the unit at an accelerating rate; when a cable speed of 1.5m/sec is reached, the braking system is activated. Once activated, the fall is quickly and smoothly arrested, applying minimal force to the user's body. Once the load is released, the cable automatically retracts back into the fall arrester.

The G.Stop 7 fall arrester can be mounted vertically above the user or horizontally, in conjunction with a suitable anchorage point.

Features:

- ✓ Weight: 5.8kg
- ✓ 136kg safe working load.
- ✓ Auto-lock karabiner.
- ✓ Quick-attach carry handle.
- ✓ Lightweight, reduced size.
- ✓ Manufactured in the UK.
- ✓ Shock absorbing brake mechanism.
- ✓ Galvanised or stainless steel cables available.
- ✓ Stopping distance between 0.6m and 1.0m
- ✓ CE certified, fully tested to European standards. Conforms to EN360
